

Technology Partners, Inc.

Facilitating Superior Results Through Leading Technology and Innovation

Who We Are

Technology Partners, Inc (dba IMAGINE Software) is a privately held company based in Charlotte, North Carolina.

We are a leading provider of medical software solutions and services that are functional, practical and effective. Our purpose is to help our customers achieve superior results through increased efficiencies and automation in their business processes.

We are industry leaders that are committed to leveraging and developing new technology to continuously improve our customers results and workflow.

We are not measured by investor returns but rather by your satisfaction. We will assist you in building the medical practice of the future - at your pace - on your terms.

What We Do

IMAGINE software delivers, implements and supports medical technology products and services designed to help practices improve efficiency and build value.

By designing systems, providing integrated workflow solutions, and supporting business functions, the IMAGINE team has the expertise and methodologies that help practices achieve peak results with less effort.
